

The background of the entire page is a close-up photograph of a marble surface. It features a complex pattern of veins in shades of cream, light beige, and soft grey, set against a lighter, off-white base. The veins are irregular and flowing, creating a sense of natural elegance and depth.

CATÁLOGO 2026

Your Time, Our Tiles

TIME CERAMICS POR EL MUNDO

Nos destacamos por nuestra pasión,
la excelencia y un enfoque centrado
a los clientes, quienes son nuestra
mayor inspiración.

Somos líderes en la fabricación de
porcelanatos y recubrimientos
porcelánicos.

Nuestra presencia
internacional cuenta
con diferentes fábricas
productoras ubicadas
en: China, Nigeria,
Pakistán y México.

Contamos con diferentes
distribuidores alrededor de la
República Mexicana: Hidalgo,
Puebla, Guadalajara, Querétaro,
Monterrey.

Así como más de quinientos
puntos de venta.

2014 NIGERIA
Apertura de la
fábrica en ciudad de
Benín, Nigeria.

2026 COLOMBIA
Próximamente...

1995 CHINA
Inicia Time Ceramics,
con sede en
Fujian, China.

2017 PAKISTÁN
Tres hornos activos en
fábrica, Cd Industrial,
Faisalabad, Pakistán.

2024 FILIPINAS
Construcción de planta
y gran inversión en dos
líneas de producción.

2029 U.S.A
Próximamente...

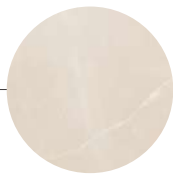

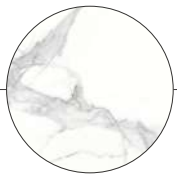

Es ir más allá de producir productos de alta calidad; es dar vida a los espacios, fusionando elegancia del diseño tradicional, vanguardia e innovación tecnológica.

VISÍTANOS

ACABADOS

Disponibles

PULIDO

Superficie totalmente lisa y brillante que realza el color y la profundidad del diseño. Ofrece un aspecto elegante y sofisticado, ideal para espacios interiores que buscan un acabado de alta gama.

HIGH GLOSS

Brillo intenso tipo espejo que aporta luminosidad y amplitud visual. Su reflejo destaca los detalles del diseño y crea ambientes modernos.

MATE

Superficie suave y sin brillo que ofrece una apariencia natural y moderna. Su textura reduce reflejos y realza la pureza del diseño, creando ambientes de elegancia, cálidos y atemporales.

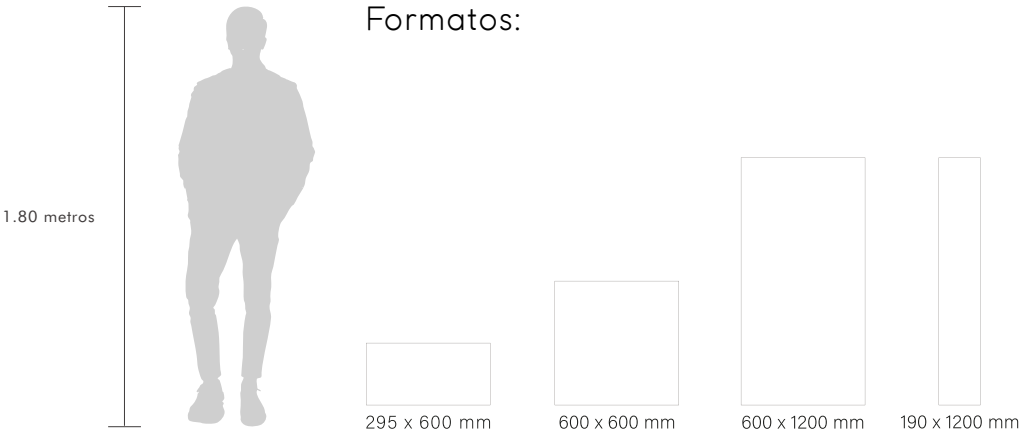

GRANILLO

Superficie con ligeras partículas granuladas que aportan textura sutil y efecto antideslizante. Su look moderno y robusto es ideal para áreas de alto tránsito o donde se busque un acabado más técnico.

Sobre Nosotros

Nuestra presencia internacional nos posiciona como líderes en innovación y excelencia dentro de la industria. Nuestra filosofía se basa en crear productos que no solo cumplan con los más altos estándares técnicos, sino que también aporten estilo y sofisticación a cada proyecto.

En Time Ceramics, somos especialistas en la fabricación de porcelanatos de alta calidad, diseñados para embellecer y transformar espacios con soluciones únicas y duraderas.

GUÍA ESENCIAL **SISTEMA DE COLOCACIÓN**

Guía práctica con los pasos esenciales para una instalación cerámica correcta y duradera, con recomendaciones simples para lograr acabados uniformes y profesionales.

BENEFICIOS:

- Mayor durabilidad.
- Acabados más limpios y uniformes.
- Reducción de errores.
- Mejor adherencia y estabilidad.
- Aprovechamiento eficiente del material.
- Mayor resistencia al desgaste.

INSTALACIÓN DE PORCELANATO:

- Prepara la superficie; debe estar limpia, nivelada y seca. Marca líneas guía para empezar derecho.

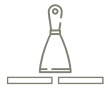

- Extiende adhesivo con llana dentada. Además para piezas grandes, pon una capa delgada también detrás de la baldosa.

- Coloca las baldosas, empieza en el centro o en un punto recto, presiona cada baldosa y usa espaciadores, por último revisa nivel y alineación. Haz los cortes necesarios.

- Deja secar completamente el adhesivo de uno a dos días.

- Aplica la boquilla, rellena juntas con fragua. Y luego limpia el exceso con esponja húmeda.

- Limpieza final, cuando seque, limpia la superficie.

MATERIALES BÁSICOS:

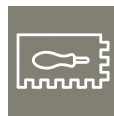

Adhesivo

Espaciadores

Martillo de goma

Llana dentada

Cortadora

Fragua

Este informe solo representa las características de las muestras sometidas a prueba, más no de donde deriva y no podrá ser reproducido total o parcialmente sin la autorización por escrito del laboratorio. El aspecto del producto puede presentar variaciones del espectro, tono y textura respecto a lo expuesto, dependiendo del lote de producción. El ácido fluorhídrico ataca todos los productos cerámicos. Esta ficha solo es aplicable a loseta de primera calidad. Esta ficha no es aplicable a las piezas complementarias.
